Duane C. Helmberger, P.E.  
Deputy Director  
Environmental Planning Division  
Department of the Air Force  
Regional Civil Engineer-Central Region  
1114 Commerce Street  
Dallas, Texas 75242

Dear Mr. Helmberger:

We are writing to clarify our letter written to you on January 21, 1988, regarding the Draft Work Plan for Scott Air Force Base. In our letter, page 2, paragraph 2, we indicated that the landfill at the base could be classified as Class 5W20 well as defined by our Underground Injection Control Program.

While the landfill can still be classified as a Class 5W20 well, the sampling we requested can be ignored. Enclosed is a form that should be completed. Once completed it should be returned to us; we will then determine whether or not this landfill is actually a class 5W20 well. In addition, the type of wastes, solid or liquid, that was disposed in this landfill should be identified and characterized as part of the work plan.

We apologize for the inconvenience. If you have any questions, please feel free to call me at 312/886-7500.

Sincerely yours,

Original signed by:  
William D. Franz
